KE Series DN15 ($\frac{1}{2}$ ") to DN200 (8") Two-port Control Valves

TI-P374-02

CH Issue 3

Description

The KE series control valves are a range of two-port single seat globe valves conforming to EN 1092. The valves are available in three body materials in sizes ranging from DN15 to DN200 ($\frac{1}{2}$ " to 8"). When used in conjunction with a pneumatic or electric linear actuator they provide characterised modulating or on/off control.

Valve characteristic - options:

- | | |
|-----------|--|
| KE | Equal percentage (E) - Suitable for most modulating process control applications providing good control at low flowrates. |
| KF | Fast opening (F) - For on/off applications only. |
| KL | Linear (L) - Primarily for liquid flow control where the differential pressures across the valve is constant. |

Important note: Throughout this document, reference has been made to the standard KE control valve. With the exception of trim type, the KE, KF and KL control valves are virtually identical.

Valve stem sealing (PTFE as standard) - options:

- | | |
|-----------|--|
| H | Graphite packing |
| B1 | Bellows sealed - Valves DN15 to DN100 can be supplied with one of two bellows seal options. PN16 bellows (suffix B1) or PN40 bellows (suffix B4). |
| B4 | |

Valve seating (metal-to-metal as standard) options:

- | | |
|----------|--|
| G | Soft seal (G) - PTFE soft seal to provide a tight shut-off. |
| W | Hard facing (W) - Stellite faced plugs and seats for more arduous applications. |

The KE series two port control valves can be used with the following actuators and positioners:

Electric	EL3500 and EL5600 series
Pneumatic	PN1000, PN3000, PN4000, PN5000 and PN6000
	PP5 (pneumatic) or EP5 (electropneumatic)
Positioners	ISP5 (intrinsically safe electropneumatic) SP2 (smart electropneumatic)

Refer to the relevant Technical Information sheet for further details.

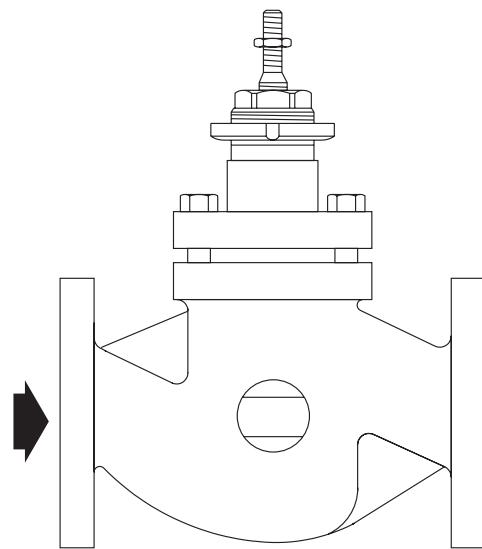

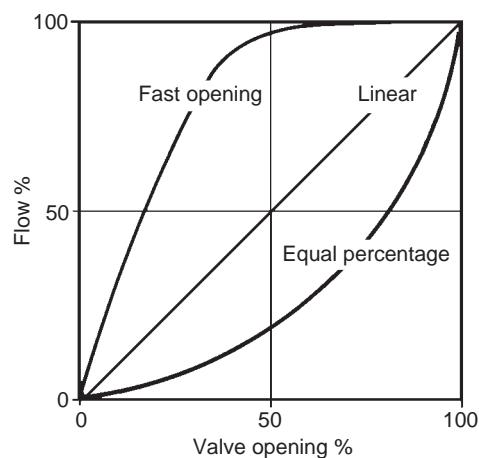

Technical data

Plug design	DN15 to DN32 ($\frac{1}{2}$ " to $1\frac{1}{4}$ ")	Caged parabolic
	DN40 to DN200 ($1\frac{1}{2}$ " to 8")	Vee port
Leakage	Metal-to-metal Soft seal	(0.01% of Kv) IEC 534-4 Class V1
Rangeability		50:1
	DN15 to DN50 ($\frac{1}{2}$ " to 2")	20 mm
Travel	DN65 to DN100 ($2\frac{1}{2}$ " to 4")	30 mm
	DN150 and DN200 (6" and 8")	50 mm

Sizes and pipe connections

Type	Body material	Connections	Size range
KE43, KE43B1 and KE43B4	Cast steel	Flanged PN40 or JIS 20*	DN15, 20, 25, 32, 40, 50, 65, 80, 100, 150 and 200
KE61	Stainless steel	Screwed BSP	$\frac{1}{2}$ ", $\frac{3}{4}$ ", 1"
KE63	Stainless steel	Flanged PN25, PN40, JIS 20 or KS 20*	DN15, 20, 25, 32, 40, 50, 65, 80 and 100
KE71, KE71B1	SG iron	Screwed BSP	$\frac{1}{2}$ ", $\frac{3}{4}$ ", 1", $1\frac{1}{4}$ ", $1\frac{1}{2}$ " and 2"
KE73, KE73B1	SG iron	Flanged PN16, PN25 or JIS 10*	DN15, 20, 25, 32, 40, 50, 65, 80, 100, 150 and 200

* Note: Other flange types are available on request, contact Spirax Sarco sales office for further information.

DN65 to DN100**Typical flow characteristic curves**

Limiting conditions

Body design conditions	KE43	PN40
	KE43B1	PN16
	KE43B4	PN40
	KE61 and KE63	PN40
	KE71 and KE73	PN25
Maximum design temperature	KE43B1, KE71B1 and KE73B1	PN16
	Standard packing PTFE	Maximum 250°C
	High temperature packing (H)	See operating limits
	PTFE soft seat (G)	Maximum 200°C
Maximum cold hydraulic test pressure of:	High temperature bolting (S)	See operating limits
	† KE43 (body and bonnet only)	60 bar g
	† KE61 and KE63 (body and bonnet only)	60 bar g
Maximum differential pressures	† KE71 and KE73 (body and bonnet only)	38 bar g
	See relevant actuator Technical Information sheet	

† Warning: Bellows must be removed if hydraulic testing is to be done.

Operating limits**KE43 and KE43B4 (cast steel)**

	Body	Bonnet										
		Packing				High temperature bolts (S) and graphite packing		Bellows		High temperature bolts (S) and B4 bellows		
		PTFE		Graphite (H)				B4 (PN40)				
Pressure (bar)	40	22	40	36	40	31	40	22	40	31	40	22
Temperature (°C)	-10/+120	-10/+400	-10/+120	-10/+250	-10/+120	-10/+300	-10/+120	-10/+400	-10/+120	-10/+300	-10/+120	-10/+400

Note: If the soft seal (option G) is to be used then the maximum design temperature allowable is 200°C.

KE71, KE73, KE71B1, KE73B1 (SG iron) and KE43B1 (Cast steel)

	Body	Bonnet						B1 option				
		Packing				High temperature bolts (S) and graphite packing		Bellows		High temperature bolts (S) and B1 bellows		
		PTFE		Graphite (H)				B1 (PN16)				
Pressure (bar)	25	17	25	22	25	20	25	18	16	13	16	11.5
Temperature (°C)	-10/+120	-10/+350	-10/+120	-10/+250	-10/+120	-10/+300	-10/+120	-10/+350	-10/+120	-10/+300	-10/+120	-10/+350

Note: If the soft seal (option G) is to be used then the maximum design temperature allowable is 200°C.

KE61 (stainless steel)

	Body	Bonnet									
		Packing									
		PTFE		Graphite (H)							
Pressure (bar)	40	25	40	25	40	22					
Temperature (°C)	-10/+45	-10/+250	-10/+45	-10/+250	-10/+50	-10/+400					

Note: If the soft seal (option G) is to be used then the maximum design temperature allowable is 200°C.

KE63 (stainless steel)

	Body	Bonnet									
		Packing									
		PTFE		Graphite (H)							
Pressure (bar)	40	23	40	28	40	22					
Temperature (°C)	-10/+50	-10/+400	-10/+50	0/+250	-10/+50	-10/+400					

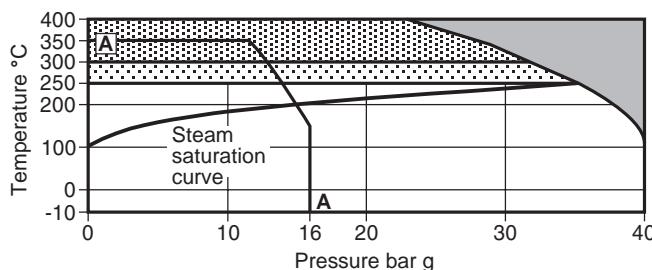

Note: If the soft seal (option G) is to be used then the maximum design temperature allowable is 200°C.

Differential pressure

For the maximum available differential pressure, see the relevant pneumatic or electric actuator Technical Information sheets.

Operating range

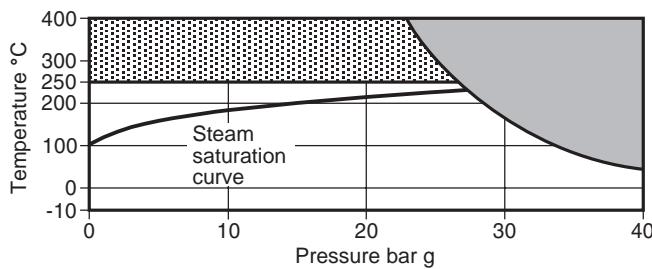

**KE43,
KE43B1 and KE43B4
(cast steel)**

- The product **must not** be used in this region.
- High temperature packing is required for use in this region.
- High temperature bolting and packing is required for use in this region.

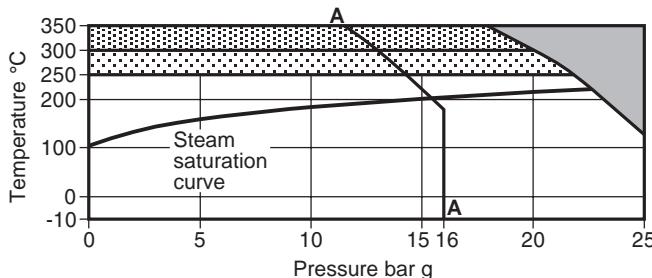

A - A Note: Valves fitted with PN16 bellows (B1) are limited to the maximum bellows rating of 16 bar.

**KE61 and KE63
(stainless steel)**

- The product **must not** be used in this region.
- High temperature bolting and packing is required for use in this region (KE63 only).

**KE71 and KE71B1,
KE73 and KE73B1
(SG iron)**

- The product **must not** be used in this region.
- High temperature packing is required for use in this region.
- High temperature bolting and packing is required for use in this region.

A - A Note: Valves fitted with PN16 bellows (B1) are limited to the maximum bellows rating of 16 bar.

How to order

Example: 1 off Spirax Sarco DN25 KE73 Kv 10 having flanged PN25 connections.

Spare parts

Note: When placing an order for spares please clearly specify the product number (found on the label of the valve body), this will ensure correct spare parts are supplied.

KE43, KE61, KE63, KE71 and KE73

Valve spares - DN15 to DN100

All spare parts available are shown in solid outline. Parts shown in broken line are not supplied as spares.

Available spares

Actuator clamping nut	A
PTFE gland seal kit for DN15 to DN50 (gasket, chevrons, spring, upper and lower bearings, 'O' ring and gland nut)	B
Gland seal kits	B1
PTFE gland seal kit for DN65 to DN100 (gasket, chevrons, guide bush and spring)	C
Graphite gland seal kit (H) (high temperature seal) (graphite stem seals, stuffing box gasket)	C
Note: The graphite gland seal kit is suitable for stuffing box and bonnet designs.	
Standard plug and stem assembly with bonnet gasket	D, E
* Plug and stem	
Soft seated plug and stem assembly with bonnet gasket	D1, E
Bonnet gasket (set of 3)	E
Seat, seat gasket and bonnet gasket	F, G, E
Valve stem only	H
Valve plug and stem kit	H, D
Valve seat only	F

***Note:** Please state equal percentage, linear or fast opening plug when placing an order.

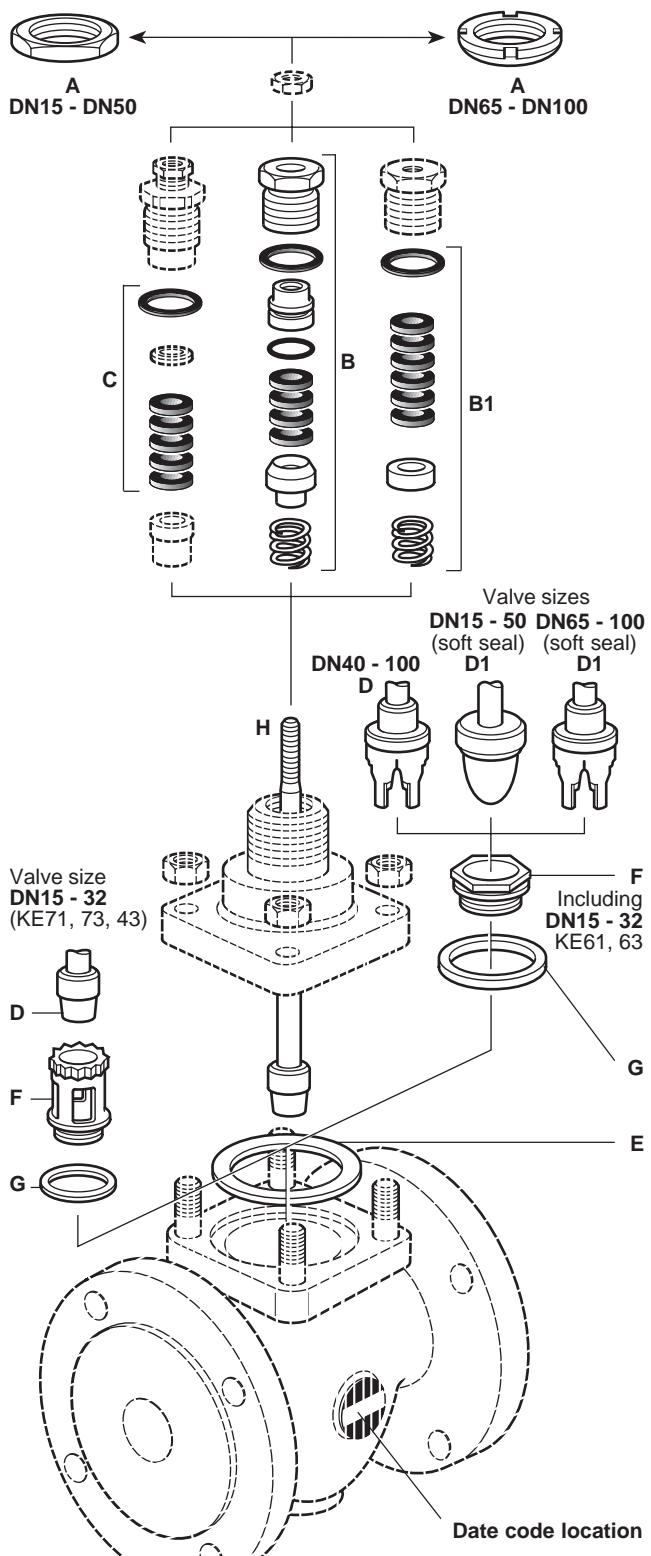

How to order spares

Always order spares by using the description given in the column headed 'Available spares' and state the size and type of valve including the date code.

Example: 1 - PTFE gland seal kit for a Spirax Sarco DN25 KE73 two-port control valve. Date coded 204.

How to fit spares

Full fitting instructions are given in the Installation and Maintenance Instructions supplied with the spare.

Bellows sealed valve Spares - DN15 to DN100

Available spares

	PTFE gland seal kit for DN15 to DN50 (gasket, chevrons, spring, upper and lower bearings, 'O' ring and gland nut)	B
Gland seal kits	PTFE gland seal kit DN65 to DN100 (gasket, chevrons, guide bush and spring)	B1
	Graphite gland seal kit (B1 only) (graphite stem seals, stuffing box gasket)	C
	Note: The graphite gland seal is suitable for stuffing box and bonnet designs.	
* Plug and pin	Standard plug	J, K
	Soft seated plug	J1, K
Seat and seat gasket		F, G
Bonnet gasket (pack of 3)		E
Bellows gasket (pack of 6)		M
B1 Spindle / bellows assembly and plug pin		K, L, M
B4 Spindle / bellows assembly and plug pin		K, L

***Note:** Please state equal percentage, linear or fast opening plug when placing an order.

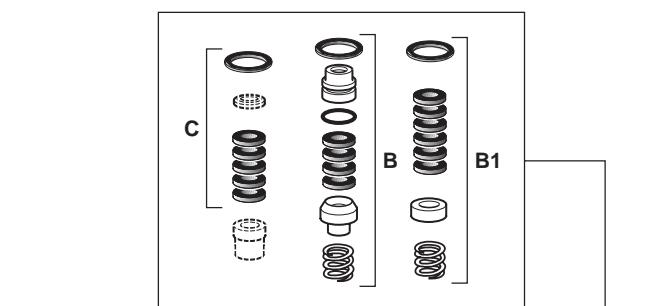

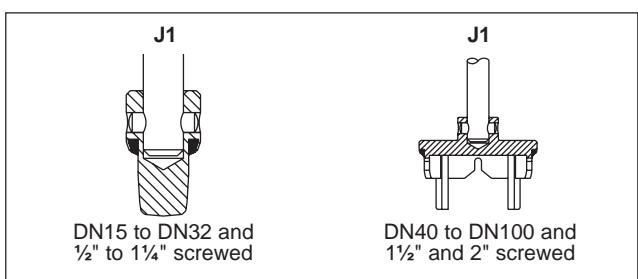

How to order spares

Always order spares by using the description given in the column headed 'Available spares' and state the size and type of valve including the date code.

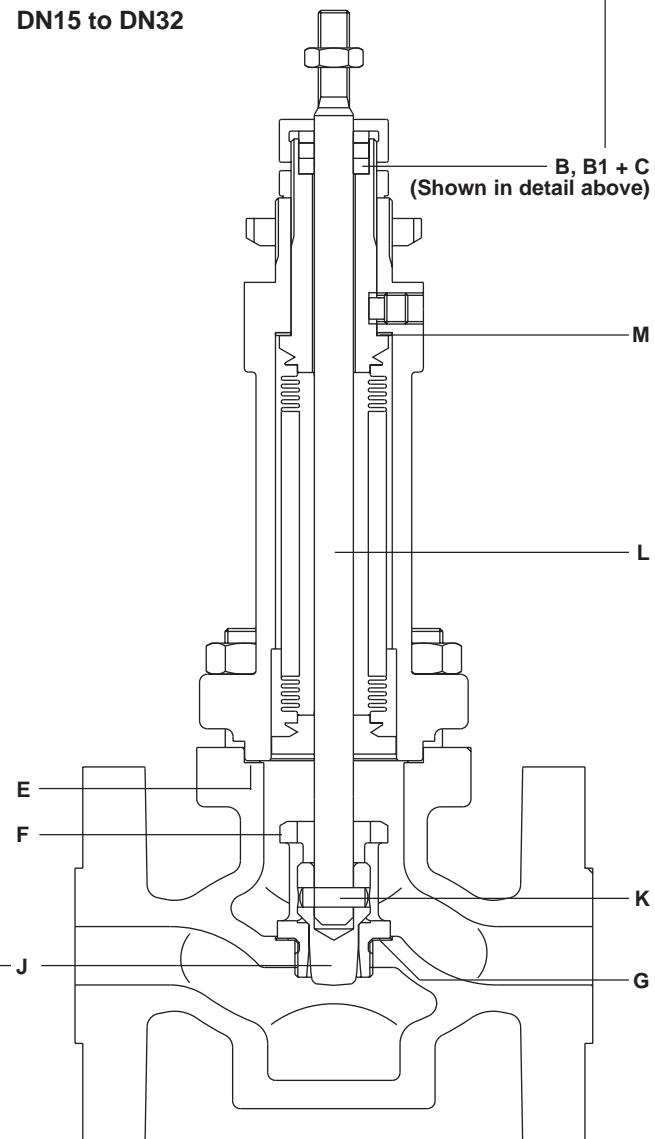

Example: 1 - Seat and seat gasket kit for a Spirax Sarco DN25 KE73B1 bellow sealed two port control valve. Date coded 204.

How to fit spares

Full fitting instructions are given in the Installation and Maintenance Instructions supplied with the spare.

DN15 to DN32

DN40 to DN100
